Please see below

I spoke to the Highway Superintendent about this today. Due to the chain saw incident I advised Frank that he should notify the CPD which he did. An officer responded to take a report. I spoke to him and we both questioned why this just came to light today. I will have that report soon and can evaluate whether this is a workplace violence incident, a harassment case or a criminal matter

In the meantime the combatants have been separated and are working on different crews pending the outcome of this investigation.

I will update as info becomes available over the next couple of days. Ms. Malone has a history of grievances and harassment complaints

Vince
